Profile Summary

I am a Graphic and UI/UX Design student with an interest in creating content that is both visually engaging and meaningful. I enjoy creating digital visuals and brand assets that help communicate stories across websites, social media, and marketing campaigns. What motivates me most is finding ways to connect design with real business needs and creating content that makes a positive impact in brand recognition.

Experience

Freelance UI/UX Designer

2023-Present

- Designed a wide range of digital products, including responsive websites, mobile app interfaces, and interactive prototypes that improved **user engagement** by up to **20%**.
- Created intuitive wireframes, user flows, and high-fidelity mockups to visualize complex user journeys clearly, resulting in **enhanced usability and improved client communication**.
- Developed and maintained consistent design systems and brand identities across digital platforms, contributing to **stronger user recognition and cohesive brand experiences**.
- Demonstrated proficiency in tools such as Figma, Miro, Sketch, and AI-enhanced platforms to **streamline design workflows and deliver user-centered solutions** within tight deadlines.
- Managed multiple UI/UX projects simultaneously, facilitating user testing, collecting client and stakeholder feedback, and implementing iterative improvements to ensure **timely delivery and client satisfaction**.

Skillset

- UI/UX Design** – Skilled in tools like *Figma, Sketch, and Miro*.
- Graphic Design** – Proficient in *Adobe Illustrator, Adobe InDesign, Adobe Photoshop, Canva, and Adobe Firefly*.
- Web Development** – Skilled in programming languages like *HTML, CSS, and JavaScript*.
- Video Editing** – Proficiency in editing short promotional clips using tools like *Premiere Pro, InShot, or CapCut* for social media and campaigns.
- Design Systems** – Experienced in *maintaining consistency through design systems* and responsive layouts for web and mobile.
- AI Tools Integration** – Familiar with using AI tools like *Cursor, Lovable, and Google Stitch* to enhance creativity and productivity.
- Collaboration & Communication** – Comfortable working in team settings, sharing feedback, and contributing to creative brainstorming sessions.

Education

Jönköping University

2024- Present

Graphic designing and web development

Jönköping, Sweden

During my academics, I have gained hands-on experience with graphic design tools including *Adobe Illustrator, Photoshop, InDesign, and Canva*, as well as UI/UX design and human-computer interaction using *Figma, Sketch and Miro*. I have also developed practical front-end web development skills with *HTML, CSS, and JavaScript*. In addition to design and technical skills, I have explored *business planning, entrepreneurship, and project management*, which have helped me approach projects strategically and collaboratively, combining creativity with problem-solving to deliver effective design solutions.
